

EZEE POLISH STRIPPER

Description: **EZEE POLISH STRIPPER** is a fast acting emulsion polish remover. It is a blend of organic and inorganic alkalis, sequestrant, wetting agents and powerful degreasing solvent.

EZEE POLISH STRIPPER cuts stripping time and leaves floor surfaces ready for new polish application.

EZEE POLISH STRIPPER removes both metallised and non-metallised emulsion polishes. Should not be used on linoleum or unsealed wood floors

Application: Ensure adequate ventilation during use

Use warm (not hot) water only – temperature must not exceed 60°C.

For mop stripping: Dilute 1:5 in warm or cold water (1:3 dilution may be required for very heavy polish build-up). Apply solution to floor surface and leave for approximately 15 minutes. Do not allow floor to dry, agitate occasionally with mop to ensure surface remains wet. Remove resultant slurry with wet pick-up vacuum or mop. Rinse thoroughly with clean water until all traces of stripper have been removed. Allow to dry thoroughly before re-applying new coat of polish.

For machine stripping: Dilute 1:10 in warm or cold water, apply to floor and machine scrub with appropriate stripping pad. Remove slurry with wet pick-up vacuum or mop. Rinse thoroughly with clean water until all traces of stripper have been removed. Allow to dry thoroughly before re-applying new coat of polish.

Storage: In original sealed container – 12 months (frost free)

Pack Size: 1 litre containers

Health & Safety: For health and safety information on this product, please refer to our material Health & Safety Data Sheets.

No liability is accepted for any loss or damage arising directly from the use of the Company's products or from the use of the information given in its publications. Prospective users should therefore satisfy themselves by appropriate trials that the product to be used is suitable for the intended use.
