

SAFESTEP

Buffable Emulsion Floor Cream

DESCRIPTION: SAFESTEP is a water based emulsion cream formulated with safety in mind. It dries quickly and offers a hard wearing durable film to the floor that is non-dusting, fully burnishable and offers excellent tractional properties when used correctly.

SAFESTEP is ideal for use on sealed timber, Granwood, cork, thermoplastic, flexible PVC, linoleum, sealed asphalt, magnesite and composition.

APPLICATION: To ensure best possible results, all previous applications of floor dressings should be removed but Safestep can be applied if necessary on top of a clean floor surface previously treated with solvent based polish or emulsion without having first removed the old dressing.

SHAKE CONTAINER BEFORE USE. Safestep should be diluted 50/50 with clean water. To a clean floor surface apply an even coat of Safestep using a suitable cloth or pad. Allow to dry well (1 hour) before burnishing with a polishing brush or suitable nylon floor maintenance pad in order to harden the polished film.

MAINTENANCE: Safestep should be burnished regularly to remove scuff marks and to ensure a good tractional surface. Floors may be cleaned occasionally using a 1:20 dilution of Safestep to restore the appearance of any worn areas, traffic lanes, etc.

As and when necessary, Safestep can be easily removed using a 1:10 solution of *Granwax Swift* in conjunction with a green floor maintenance pad.

PRECAUTIONS: Store away from frost.
