

LOW FOAM SWIFT

Heavy Duty Hard Surface Cleaner/Degreaser

DESCRIPTION: **LOW FOAM SWIFT** is an efficient, alkaline multi-purpose hard surface cleaner/degreaser containing water soluble solvent, is fully biodegradable and effective in hard or soft water and in hot or cold solution. The 'low foaming' properties of **LOW FOAM SWIFT** make the product ideal for use through automatic scrubber/drier machines but it can also be used with conventional rotary floor scrubbing machines fitted with green or blue pads.

Low Foam Swift should be used for preparing Granwood, Gransprung and wooden flooring prior to re-finishing, (please refer to our recommended procedure data sheets, available upon request).

Please note: When floors are to be refinished, or cleaned using a strong solution of Low Foam Swift, it is recommended that Granwax 'Neutrasol' is applied to the floor (at the same chosen dilution rate as the Low Foam Swift) after the cleaning procedure and prior to rinsing with clear water. This will ensure that all traces of alkaline residue are removed.

Low Foam Swift is particularly recommended as a maintainer for Granwood, Gransprung and wooden floors in sports halls, gymnasiums and general activity areas subjected to outdoor shoe traffic and/or particularly dirty locations.

RECOMMENDED DILUTIONS:

Light floor cleaning:

1 litre Low Foam Swift to 30 litres water

Rinse with clear water and allow to dry prior to resuming use.

Medium floor cleaning or floors considered to be slippery

1 litre Low Foam Swift to 20 litres water

Rinse with clear water and allow to dry prior to resuming use.

Heavy floor cleaning

For excessively dirty, greasy or slippery floors, dilute 1 litre Low Foam Swift to 4 litres water. It is suggested that the solution is applied and allowed time to penetrate and emulsify dirt and grease, machine scrub and remove resultant slurry, neutralise and rinse with either 'Neutrasol' or clean water.

Black 'heel' marking

Low Foam Swift can also be used neat through a trigger sprayer to remove black 'heel' marks. This operation should be carried out a few minutes before the scrubbing procedure.

PACK SIZE: 5 litre

STORAGE: Store in a cool, dry place. Protect from frost.

HEALTH & SAFETY: For full health and safety information on this product, please refer to our Material Health & Safety Data Sheet.

No liability is accepted for any loss or damage arising directly from the use of the Company's products or from the use of the information given in its publications. Prospective users should therefore satisfy themselves by appropriate trials that the product to be used is suitable for the intended purpose.
