

# TUFSHEEN 25

## *High Solids Metallised Emulsion Polish*

- DESCRIPTION:** TUFSHEEN is a blend of acrylic polymer and polyethylene waxes. It offers an extremely durable finish and lasting shine, with a high degree of resistance to soiling and neutral detergents. Ideal for use on thermoplastic, vinyl, linoleum, asphalt, concrete, sealed cork and timber surfaces.
- INSTRUCTIONS:** Clean the floor thoroughly, removing the old dressing with your preferred Granwax stripper. Our recommendations are that this should be either ALKALINE STRIPPER, LIFT OFF or SWIFT. Please note however, if this stripping procedure is to take place on a wooden floor surface, care is needed as the use of alkaline based strippers will damage unsealed wood. If in any doubt, please seek advice from our Technical Department before commencing work.
- Rinse with clean water and allow to dry. Apply an even coat of TUFSHEEN 25 by applicator or clean mop. Do not rub emulsion into floor. When first coat is dry, apply a second coat at right angles to the first. The polish film will harden for several hours after drying. For best results, therefore, the floor should be left for as long as possible before use, preferably overnight.
- MAINTENANCE:** Sweep floor daily. When surface becomes soiled, damp mop or spray clean with a solution of Speedkleen or Grangel. Burnish when dry. It may be necessary to strip off the polish from time to time. The frequency of this however depends on the kind of traffic the floor is subjected to and the type of maintenance programme implemented.
- PRECAUTIONS:** Protect from frost. Keep out of the reach of children.
- HEALTH & SAFETY:** Please refer to the product Material Safety Data Sheet for full information.
